

Energy & Power

Our Energy & Power practice includes US-trained lawyers on Energy Law & Regulation. We offer a diverse array of services across the downstream petroleum, electricity, and solar and clean energy sectors:

- Eminent domain issues in energy production and distribution;
- Power rates;
- We represent clients in oil procurement contracts;
- We obtain licenses for oil marketers and distributors and traders in liquefied gas;
- We represent clients on legal issues touching on electricity generation and distribution;
- We review, and litigate on, antitrust claims on pricing of power;
- We advise clients in the Energy & Power Industry on regulatory compliance;
- We represent clients in renewable & clean energy sub sectors;
- Dispute resolution.
